Automotive Solutions

**Active RFID technology
drives the automotive industry**

Today, one out of every three vehicles in the world is manufactured using IDENTEC SOLUTIONS technology. IDENTEC SOLUTIONS' systems are the most advanced and effective industry specific solutions available to the automotive sector.

Exceptionally robust, powerful and reliable, each system is based on active RFID technology to deliver the highest quality solution possible. That translates into increased efficiency, enhanced productivity and substantial ROI.

OIS Technology

variSys – maximum process reliability in production

IDENTEC SOLUTIONS' RFID system OIS-P has set the bar high for subsequent product generations. The new ID system platform variSys, boasts even more advanced integration capabilities and superior performance features.

Specifically designed for ultimate reliability in harsh production environments, variSys identification system platform ensures that at even during maximum speed of handling, the highest degree of reliability and transparency are maintained.

By identifying problems immediately, downtime is virtually eliminated, cycle times are shortened, and quality control efforts are enhanced.

PC3440-SER

Compact unit with serial interface:
RS232/422/485, TTY (current loop).

The advantages at a glance:

- For integration into the automation architectures, variSys offers the industry standard; Profibus, Ethernet, and now ProfiNet, according to the AIDA standard. Corresponding PLC function blocks enable easy integration.
- Rugged industrial design of the control units of the variSys system make it ideally suited for use in welding and paint shops.
- The system has been designed to have a long life and is easily able to withstand extreme temperatures of up to 235 degrees Celsius.
- Sophisticated frequency management allows for any number of secure readers along the production line.

ILR[®] Technology

IntelliFIND^{RTLS} - the future of asset management

IDEN-TEC SOLUTIONS' Real Time Locating System: IntelliFIND^{RTLS} addresses many of the challenges associated with finished vehicle logistics.

IntelliFIND^{RTLS} can track objects in large areas as well as precisely identify, monitor, locate and contact – automatically and contactless.

IntelliFIND^{RTLS} delivers the most transparent and easily deployed Real Time Locating system available. For IDEN-TEC SOLUTIONS' customers, this means a completely new opportunity to significantly improve control and optimize logistical management procedures.

The advantages at a glance:

- The system identifies the exact position of vehicles onsite - eliminating the need to search and ultimately minimizing delays.
- Park and load operation monitoring means incorrect loading is avoided while ensuring that delivery schedules are met.
- IntelliFIND^{RTLS} can be easily deployed and expanded.
- "Intelligent Long Range (ILR) Gen3 products communicate at distances of up to 500 meters, and can pin point a location precisely – down to three meters.

ILR[®] GEN3 – High technology for Transportation & Logistics

The new product generation ILR Gen3 provides a holistic approach to solving an array of challenging business issues in the transportation and logistics industries and industrial parks.

The patented Intelligent Long Range (ILR) technology can be found at the heart of IDEN-TEC SOLUTIONS' variSys and IntelliFIND^{RTLS}, and it is also the foundation for a wide range of active RFID systems. Among other industries, IDEN-TEC SOLUTIONS offers proven and award-winning solutions for Gate Access, for automated container management, efficient inventory management and of course transportation and logistics.

For more information on how active RFID technology can optimize your business processes, please contact IDEN-TEC SOLUTIONS customer representative.

About IDENDEC SOLUTIONS

IDENDEC SOLUTIONS has been at the forefront of the intelligent active RFID industry since 1999. Today, IDENDEC SOLUTIONS enables business process optimization in the automotive, logistics, healthcare, pharmaceuticals, construction, personnel safety and oil, gas & mining industries.

As a technology solutions provider IDENDEC SOLUTIONS often collaborates with partners in various industries to offer unique and innovative solutions. A pioneer in the RFID industry, IDENDEC SOLUTIONS extensive client roster includes many of world's leading organizations such as

- Volkswagen
- Audi
- BMW
- Daimler
- Nissan
- KIA
- Mercedes Benz
- Hyundai
- General Motors

Also used by system integrators, IDENDEC SOLUTIONS technology is utilized by the North American based pharmaceutical corporation McKesson, e-plate – a manufacturer of RFID based license plates for cars, and Intellion whose comprehensive solutions provide automation in production and logistics.
